

CONNECTING COMMUNITIES & ENGAGING STAKEHOLDERS FOR REAL IMPACT

Kaka Memorial Foundation's Strategic Blueprint
and Roadmap for Community Development in
Upholding Human Rights, Social Justice and
Sustainable Growth.

Preamble

“Impacting humanity through Kindness” is our motto. Kindness is the quality of being friendly, generous, considerate and compassionate towards others. It involves showing empathy, understanding, and a willingness to help or support people without expecting anything in return.

The strings of unity and progress consistently attach humanity in order to achieve development and growth in all of life realities.

Human rights can only be effectively exercised, enjoyed and preserved when opportunities are created, harnessed and progressively utilized especially within communities that can only afford the barest minimum of human living conditions.

The United Nations (UN) identifies humanitarian activities in a number of pedestals particularly with the understanding that poverty is not just a lack of income but a lack of; education, food, health care, shelter, political inclusion, choice, safety, dignity etc.

Kaka Memorial Foundation consistently brings to life the ideals of humanity. Through advocacy and interventions, we envision reaching out to communities so as to deliberately connect stakeholders in order to achieve real impact in sustainable dimensions of growth.

01. Introduction.

The idea of Kaka Memorial Foundation was birthed after my dear mother Hajiya Rukayyah Suleiman Kaka Gegu passed April 30th, 2021.

When I considered her passion for education and the consistent push and advocacy of equal edge in life and rising above mediocrity and how over the years, through my professional experience and interaction with stakeholders in various pedestals of the development tangent, it became clear that the need to deliberately set structures for real impact is inevitable.

Many communities particularly in the rural areas are completely oblivious of many things because of the lack of basic amenities and access to opportunities that would bring sustainable growth through meeting their immediate needs and harnessing their potentials.

Mrs. Zainab Inuwa Gani Esq.
Founder & Director,
Kaka Memorial Foundation

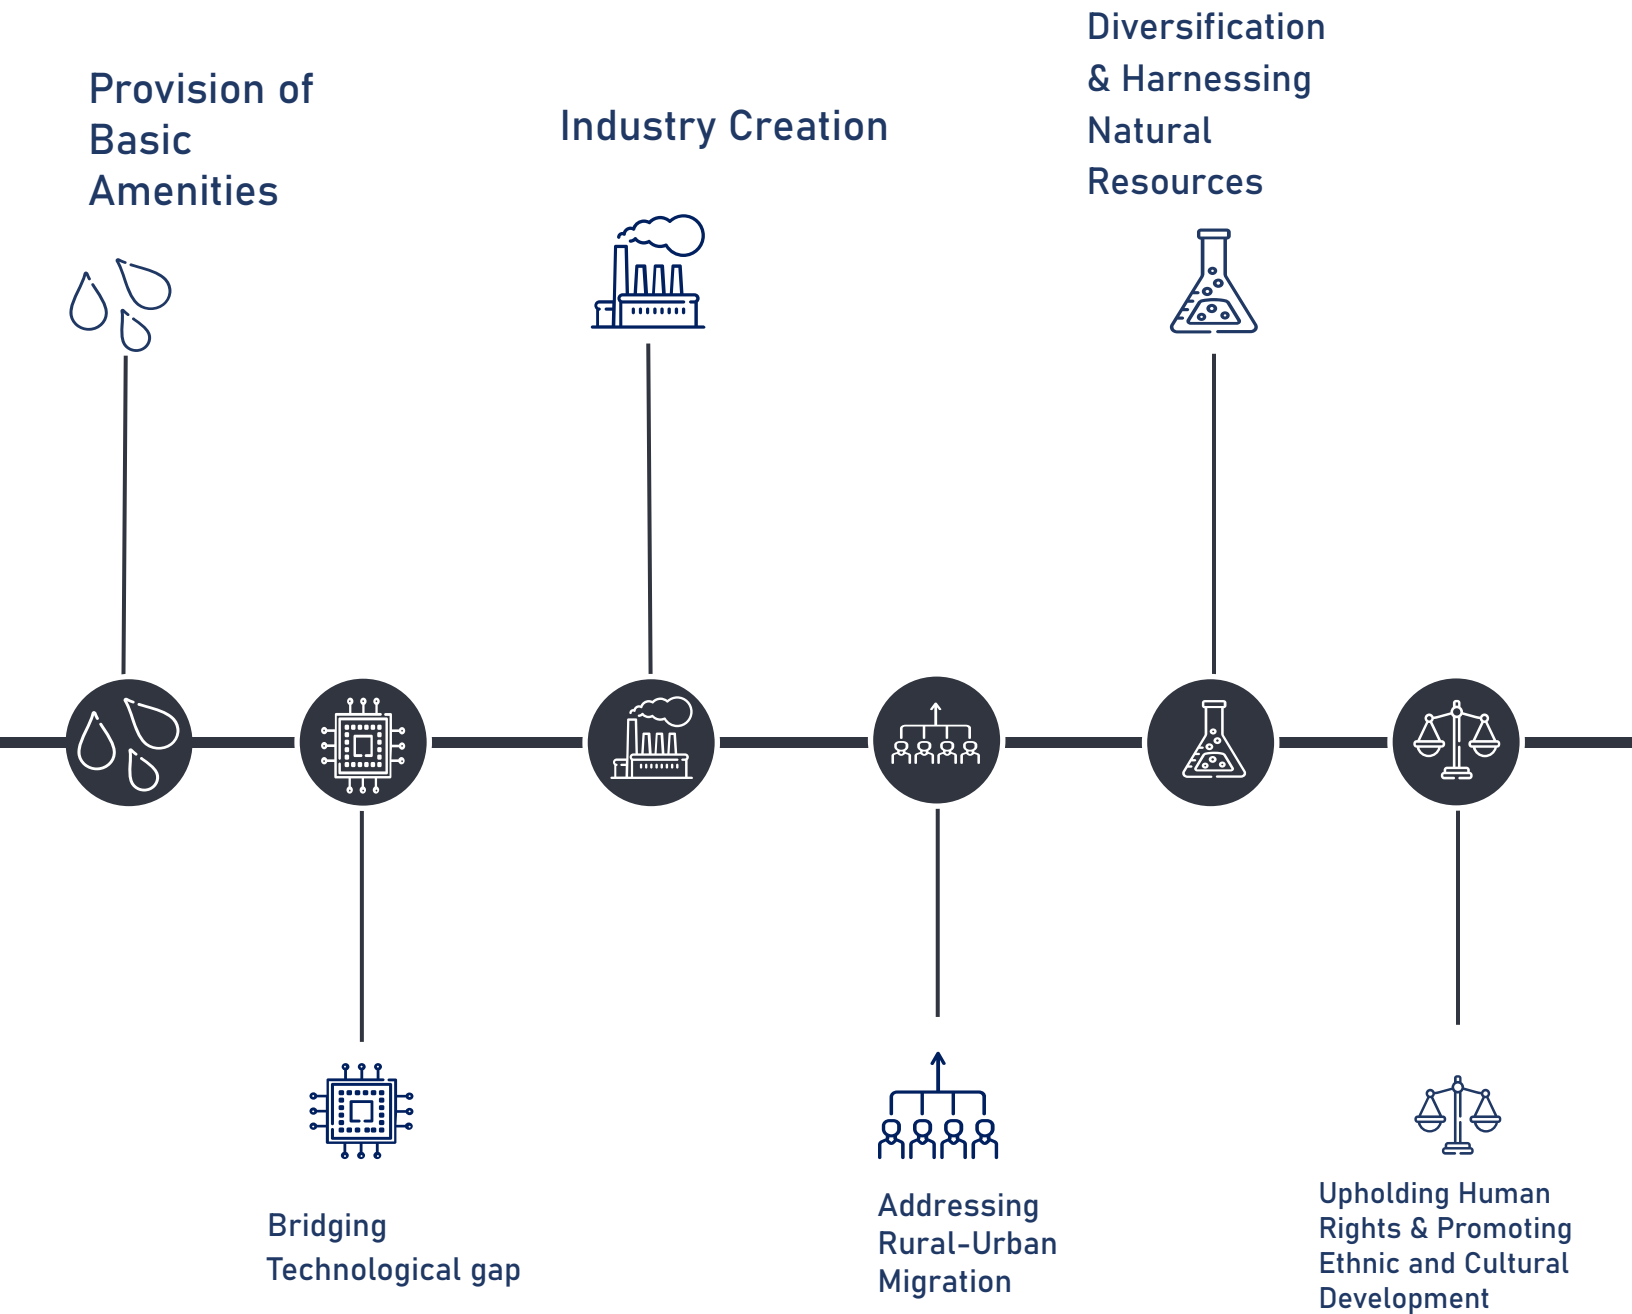

Kaka Memorial foundation has a purpose-driven resolution to function effectively through outreaches, engagements, collaborations, and project implementation in specific ways that will transform communities, countries and the entire world.

Beyond the need to push for a global consciousness on the need to impart and acquire knowledge, development comes with the power of innovation.

The opportunity for people to have better standards of living, earn higher incomes, participate in the decisions that most affect them, and build better futures for themselves and their families is priceless.

Inclusive participation strengthens economic growth and reduces inequality. This in turn contributes to a stable and resilient society that gives all individuals better opportunities to fulfil their potentials by experiencing sustainable growth.

02. Pillars

02. Pillars

PROVISION OF BASIC AMENITIES:

This is the foundation of every development. From our perspectives, provision of these basics will rapidly impact lives and the issue of underdevelopment will fall into place.

The provision of basic amenities is essential for rural development. Access to clean water, sanitation, electricity, healthcare, education, and transportation are basic rights and are necessary for people to reach their full potential.

In rural areas, poverty and lack of access to basic amenities are often interrelated. Without access to clean water and sanitation, people are more likely to suffer from diseases and malnutrition. Without access to electricity and transportation, it is difficult for people to get to work or school, or to access healthcare and other essential services.

Investing in basic amenities in rural areas can have a rapid and positive impact on people's lives. It can improve health and well-being, reduce poverty and promote economic growth. For example, studies have shown that access to clean water and sanitation can reduce child mortality by up to 60%, access to education and healthcare can help people to develop the skills and knowledge they need to get better jobs and earn higher incomes. Improved transportation can make it easier for people to get to markets and sell their goods, and for businesses to access the resources they need.

The provision of basic amenities in rural areas requires a collaborative effort from governments, donors and the private sector. Governments have a primary responsibility to provide basic amenities to their citizens. However, donors and the private sector can play an important role in supporting government efforts and providing innovative solutions.

INDUSTRY CREATION:

This is the time to revive moribund industries while building new industries that are effective in the global innovation space. Our push is for more industries to be established in the rural areas where untapped human and natural resources abound. Industry creation provides jobs, generates income and stimulate growth. They also help to attract and retain people in rural areas.

BRIDGING TECHNOLOGY GAP:

Nigeria has a significant technology gap. With a large portion of the population lacking access to basic technologies such as the internet and smartphones. This gap hinders Nigeria's economic and social development, and it is important to bridge it in order to create a more prosperous and equitable society.

One way to bridge the technological gap in Nigeria is to focus on utilizing Nigerian solutions to Nigerian problems using technology. This means developing and deploying technologies that are specifically designed to address the needs of Nigerians in a cost-effective and sustainable manner. For example, Nigerian entrepreneurs have developed a number of innovative solutions to address challenges in healthcare, education and agriculture.

In bridging the technological gap, the government can play a role in supporting the development and deployment of these solutions by providing funding, technical assistance, and other forms of support.

Another way to bridge the technological gap in Nigeria is to adapt successful frameworks from other third-world countries. There are a number of countries that have made significant progress in bridging their own technological gaps in recent years. By studying the frameworks that have been successful in these countries, Nigeria can learn from their experiences and develop its own tailored approach to bridging its own technological gap.

RURAL-URBAN MIGRATION:

Rural-Urban migration is a major challenge in Nigeria. Millions of people migrate from rural to urban areas in search of better job opportunities, education, and healthcare. However, this migration can have a number of negative consequences, including congestion in urban areas, climate hazards and a development gap between rural and urban areas.

It is important to reduce urban-rural migration in Nigeria in order to create a more balanced and sustainable development trajectory. This can be done by deliberately engaging with stakeholders to ensure that there is a conscious and deliberate reduction of the congestion in the urban areas. This can be achieved by investing in rural development, promoting rural-urban linkages by supporting the development of agro-industries, rural tourism and other activities that connect rural and urban areas. Government services should be decentralized and brought closer to rural communities.

DIVERSIFICATION AND HARNESSING NATURAL RESOURCES:

The over-dependence on the oil sector has been a major challenge to Nigeria's economic development. The volatility of oil prices and the decline in oil production have had negative impact on the Nigerian economy. It is important to diversify the Nigerian economy and harness the country's natural resources found in every state in order to achieve sustainable development. This can be done by developing the non-oil sectors. Such as agriculture, manufacturing, Mining and tourism. Agriculture and ICT are two sectors among others, with great potential for Nigeria. Agriculture can provide food security, create jobs for millions of Nigerians and generate income for rural communities. ICT can help to improve productivity and efficiency in all sectors of the economy. In every state of the country, there are untapped tourist attractions that can showcase the rich culture of Nigeria to the world and generate revenue for sustainable growth.

UPHOLDING HUMAN RIGHTS & PROMOTING ETHNIC AND CULTURAL DEVELOPMENT:

Human rights remain at the core of the springboard for sustainable development and global peace. The United Nations Universal Declaration on Human Rights (UNDHR) 1948 widely remains a common standard of achievements for all peoples and all nations.

The African Charter on Human and People's Rights (Banjul Charter) 1981 also deliberately paves paths of precision in promoting and protecting human rights and basic freedoms across the continent of Africa.

The Constitution of the Federal Republic of Nigeria 1999(as altered) and other relevant legislative texts also contain specific roadmaps, laws and objectives that are in tune with the need to uphold human rights and promoting ethnic and cultural development.

Kaka Memorial Foundation is inspired to participate, promote, assist and collaborate with government agencies, Non-governmental Organizations, international bodies and such to consistently push for better realities on the pedestals of human dignity, equal and inalienable rights, freedom, justice, peace and development particularly for the rural communities and underdeveloped places.

Ethnic and cultural development also remains key as Kaka Memorial Foundation is well aware of how that the core values and behavioral underpinnings of human capacity development records better efficiency when the ethnic and cultural peculiarities are put into consideration for priorities, choices, patterns and development trajectory.

03. Roadmap

PILLAR 1: PROVISION OF BASIC AMENITIES

Objective 1: Ensure access to clean water and sanitation for all Nigerians.

Strategies:

- Collaborate with stakeholders in the construction and rehabilitation of water and sanitation facilities.
- Promote public-private partnerships to deliver water and sanitation services.
- Raise awareness of the importance of hygiene and sanitation.

Target: By 2040, achieve universal access to clean water and sanitation.

Objective 2: Ensure access to electricity for all Nigerians.

Strategies:

- Push for more involvement of government private initiatives in the expansion of the electricity grid.
- Promote the use of renewable energy sources.
- Advocate for the efficiency of the power sector.

Target: By 2040, achieve universal access to electricity.

Objective 3: Ensure access to quality healthcare for all Nigerians.

Strategies:

- Advocate for more support in the construction and rehabilitation of healthcare facilities.
- Collaborate with stakeholders in training and recruiting more healthcare workers.
- Consistently engaging government to make healthcare more affordable and accessible.

Target: By 2050, achieve universal access to quality healthcare.

Objective 4: Advocate and ensure access to quality education for all Nigerians.

Strategies:

- Reaching out to national and international organizations for the construction and rehabilitation of schools.
- Support in the training and recruitment of more teachers.
- Advocating for more participation in activities geared towards making education more affordable and accessible.

03. Roadmap

PILLAR 2: INDUSTRY CREATION

Objective 1: Collaborate with national and international organizations for the creation and sustaining of jobs in the manufacturing, tourism and other identified sectors.

Strategies:

- Advocate for government policies that provide tax breaks and other incentives to manufacturers.
- Campaign for more investment in infrastructure and skills development.
- Promote public-private partnerships in the manufacturing, Tourism and other identified sectors.

Target: Enhance collaboration for the creation of 1 million jobs in the manufacturing, Tourism and other identified sector by 2040.

Objective 2: Advocate for the creation and sustenance of jobs in the agricultural sector.

Strategies:

- Assist farmers in getting access to improved seeds, fertilizers, and equipment.
- Collaborate with national and international organizations for more Investment in rural infrastructure and skills development.
- Promote agro-processing and value addition.
- Promote and adopt the use of Technology for farmers

Target: Enhance collaboration for the Creation of 2 million jobs in the agricultural sector by 2040.

PILLAR 3:

BRIDGING THE TECHNOLOGICAL GAP

Objective 1: Collaborate with relevant stakeholders for increased access to the internet and other technologies.

2: Create awareness through collaborations with community leaders on the use of technology.

Strategies:

- Campaign for more, deliberate and effective Investment in the expansion of broadband internet coverage.
- Advocate for the reduction of the cost of internet access.
- Promote digital literacy and skills development through effective collaboration with relevant stakeholders.

Target: By 2040, achieve 70% internet penetration.

Objective 3: Support and advocate for the development and commercialization of indigenous technologies.

Strategies:

- Advocate for increased investment in research and development.
- Create awareness for startups and small businesses on how to access financial support.
- Advocate for legislations and government policies that will create an enabling environment for innovation.

Target: By 2035, to have campaigned, assisted and advocated for at least 10 Nigerian indigenous technologies commercialized and adopted by the global market.

PILLAR 4: RURAL-URBAN MIGRATION

Objective 1: Collaborate to ensure that rural areas are more attractive places for people to live and businesses to thrive.

Strategies:

- Promote, advocate and foster collaboration for more investment in rural infrastructure; such as roads, electricity, and telecommunications.
- Promote and advocate for government and donor agencies to provide access to healthcare and education in rural areas.
- Enhance and advocate for the creation of jobs and economic opportunities in rural areas.

Target: To assist in the reduction rural-urban migration by 50% by 2045.

PILLAR 5: DIVERSIFICATION AND HARNESSING NATURAL RESOURCES

Objective 1: Reduce the reliance on the oil sector.

Strategies:

- Advocate for more investment in the development of the non-oil sectors, such as agriculture, manufacturing, and tourism.
- Assist in providing incentives to businesses in the non-oil sectors.
- Promote exports of non-oil products.

Target: Reduce the contribution of the oil sector to GDP from 70% to 50% by 2035.

Objective 2: Harness natural resources for sustainable development.

Strategies:

- Develop a comprehensive framework for the management of natural resources.
- Promote the sustainable use of natural resources.
- Collaborate for more investment in infrastructure to support the exploitation of natural resources.

Target: Increase the contribution of the natural resources sector to GDP from 10% to 35% by 2040.

This roadmap provides a starting point for achieving the Kaka foundation objectives through its strategic Pillars.

PILLAR 6: UPHOLDING HUMAN RIGHTS AND PROMOTING ETHNIC AND CULTURAL DEVELOPMENT

Objective 1: Advocate for a culture of Human Rights respect and protection

Strategies:

- Promote human rights education and awareness through community-based initiatives, school curricula and public campaigns.
- Enhance human rights monitoring and reporting mechanisms to identify and address violations.
- Advocate for the strengthening of the capacity of law enforcement and judicial institutions to uphold human rights standards.

Target: Increase the percentage of Nigerians reporting knowledge of basic human rights from 50% to 70% by 2035.

Objective 2: Protect and promote ethnic and cultural diversity.

Strategies:

- Support the preservation and revitalization of indigenous languages, traditions, and cultural practices recognizing the unique contributions of rural communities to Nigeria's cultural heritage.
- Promote human rights education and awareness through community-based initiatives, school curricula and public Promote intercultural dialogue and understanding through exchange programs, cultural events, and media initiative highlighting the cultural

- Advocate for policies that safeguard the rights and interests of marginalized ethnic and cultural groups.
- Advocate, participate and assist local, national and international stakeholders in the research, tracing, analyzing, collaboration and recognition of indigenous people and ethnic groups.

Target: Reduce the prevalence of ethnic and cultural discrimination in Nigeria by 15% by 2035

Objective 3: Empower marginalized communities for inclusive development.

Strategies:

- Provide access to education, healthcare and employment opportunities for marginalized groups.
- Support economic and social empowerment of women, youth and persons with disabilities through community engagement and expert consultation.
- Promote the participation of marginalized communities in decision-making processes.

Target: Increase the representation of marginalized groups in leadership positions by 20% by 2030

IMMEDIATE ACHIEVABLE OBJECTIVES

01. PROVISION OF BASIC AMENITIES:

- ✓ Campaign for the rehabilitation of existing water and sanitation facilities.
- ✓ Assist in the provision of mobile health clinics to rural areas.
- ✓ Get support to build and renovate classrooms in underserved communities.

02. INDUSTRY CREATION:

- ✓ Promote public policies to provide tax breaks and other incentives to manufacturers and agro-processors.
- ✓ Launch a public awareness campaign to promote entrepreneurship.

03. BRIDGING THE TECHNOLOGICAL GAP:

- ✓ Get support and aid to assist in reducing the cost of internet access by providing subsidies to low-income households.
- ✓ Launch a digital literacy campaign for adults and youth.

04. URBAN-RURAL MIGRATION:

- ✓ Collaborate with relevant outfits to improve security in rural areas.
- ✓ Connect investors to provide financial support to farmers to invest in new technologies.

05. DIVERSIFICATION AND HARNESSING NATURAL RESOURCES:

- ✓ Develop a roadmap for the development of the non-oil sectors.
- ✓ Promote public-private partnerships in the renewable energy sector.

06. UPHOLDING HUMAN RIGHTS & PROMOTING ETHNIC AND CULTURAL DEVELOPMENT:

- ✓ Collaborate with Law enforcement agents and Human Rights Advocacy groups
- ✓ Engage Lawyers for rural communities to get better access to legal representation

Writing letters and emails to relevant stakeholders to seek audience on how best to implement and adopt all of these as a contribution of the organization for a sustainable and inclusive growth for Nigeria

INTERMEDIATE ACHIEVABLE OBJECTIVES

PROVISION OF BASIC AMENITIES:

- Advocate for the construction of new water and sanitation facilities in underserved communities.
- Collaborate with experts and donors to expand the coverage of rural electrification programs.
- Assist and campaign to ensure that new schools and hospitals are built and maintained in rural areas.

BRIDGING THE TECHNOLOGICAL GAP:

- Encourage the expansion of broadband internet coverage to rural areas.
- Work with experts and investors to provide digital literacy training to teachers and students in rural schools.

INDUSTRY CREATION:

- Advocate for the establishment of industrial parks in rural areas.
- Collaborate with donors to provide financial support to startups and small businesses in the non-oil sectors.

RURAL-URBAN MIGRATION:

- Advocate vigorously for the creation of jobs and economic opportunities in rural areas.
- Improve the quality of life in rural areas.

DIVERSIFICATION AND HARNESSING

NATURAL RESOURCES

- Implement the roadmap for the development of the non-oil sectors.
- Promote the sustainable use of natural resources.

UPHOLDING HUMAN RIGHTS & PROMOTING ETHNIC AND CULTURAL DEVELOPMENT

- Provide assistance in community-interest-based litigation to hold relevant agencies to account.
- Engage stakeholders more actively in reducing cases of human right abuses
- Participate in developmental projects for ethnic and cultural development

LONG TERM ACHIEVABLE OBJECTIVES

PROVISION OF BASIC AMENITIES:

- Universal access to clean water and sanitation.
- Universal access to electricity.
- Quality healthcare and education.

BRIDGING THE TECHNOLOGICAL GAP:

- Support and publicize activities in the development and commercialization of indigenous technologies.
- Enhance prospects for making digital innovation a continuous reality.

INDUSTRY CREATION:

- Support diversified economy for more industries.
- Assisting stakeholders in exports of non-oil products.

RURAL-URBAN MIGRATION:	DIVERSIFICATION AND HARNESSING NATURAL RESOURCES:
▪ Achieve a balance between urban and rural populations. ▪ Create a more equitable society where people can thrive in both urban and rural areas.	▪ Achieve a sustainable balance between economic development and environmental protection. ▪ Be a global leader in the responsible management of natural resources

UPHOLDING HUMAN RIGHTS & PROMOTING ETHNIC AND CULTURAL DEVELOPMENT
▪ More awareness and preservation of human rights ▪ Easy access to justice and redress ▪ Drastically reduce incidents of human rights abuse ▪ Better ethnic and cultural inclusion for development and progress

05. Policy Development Strategy

In identifying the issued to be addressed, we will carefully engage specific communities to identify first-hand all the core challenges they consistently grapple with then we identify modalities for the best practicable approach towards getting solutions that are workable and realistic. The involvement of relevant partners, government institutions and donor agencies will be adequately effective.

The agenda will remain lifting the most vulnerable, displaced, disadvantaged and neglected people in the rural areas from the impediments that keep them in some of the most dehumanizing living conditions. We are focused on not just bringing development to them but equipping them to further develop their own indigenous innovations for sustainable productivity in the sense that after basic amenities are provided and the people are able to maximize opportunities available, the need to get them to also function effectively in working towards better living standards will be met.

Issues to be addressed range from;

- ✓ Education
- ✓ Access to healthcare
- ✓ Access to Justice
- ✓ Food scarcity
- ✓ Maternal mortality
- ✓ Sexual and Gender Based violence
- ✓ Discrimination and marginalization
- ✓ Job creation
- ✓ Provision of Agricultural equipment
- ✓ Efficient data collection for productive results.

06. Conclusion

Globally, government all around the world consistently seek to better the living standards of citizens. One of the core values that keep us united as human beings is the common features we share and the natural endowments that we individually and collectively possess.

Organized institutions and political structures that identify legitimacy and authority both locally and internationally need the support and collaboration of every stakeholder in order to achieve sustainable development and push for other great ideals.

Kaka Memorial Foundation is a not-for-profit organization that is deliberate about doing more than just the average to lift people, society and communities higher on the developmental tangent with a better synergy among corporate bodies, civil society, government institution, international systems and the people.
